accepting the present value of their pension benefits as a lump-sum payment instead of an annuity. Electing employees were eligible to receive certain benefits, including a special payment equivalent to five percent of their base pay times full years of service (not to exceed 100% of base pay), net of certain offsets. The retirement options were accounted for in accordance with SFAS 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits." Accordingly, BellSouth recognized expense of \$68.6 in 1991 and \$14.6 in 1990 related to these offers.

Defined Contribution Plans. BellSouth maintains contributory savings plans which cover substantially all employees. Effective in 1990, a leveraged ESOP feature was incorporated into both the BellSouth Management Savings and Employee Stock Ownership Plan and the BellSouth Savings and Security Plan (collectively, the "Plans"). The shares that were purchased by the Trusts with proceeds from the ESOP notes (see Note F) are allocated to participants' accounts throughout the thirteen-year debt repayment period of the leveraged ESOP program as described below.

accrued and funded into a separate tax advantaged trust. These contributions are funded over the working lives of active employees and the remaining lives of the retirees. Postretirement life insurance benefit costs are accrued and funded over the working lives of active employees based on that group's historical claims experience.

In December 1990, the Financial Accounting Standards Board (the "Board") issued SFAS 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions," which BellSouth adopted January 1, 1993. The statement requires employers to accrue the cost of providing postretirement benefits other than pensions during the period employees are expected to earn the benefit.

BellSouth's estimated transition benefit obligation of \$1.5 billion will be amortized over the average remaining service period of active plan participants, which is 15 years. Based on this transition method, the 1993 expense is projected to be about \$271.0, which is approximately 15% higher than the projected 1993 postretirement expense determined under the former accounting method. The effect on net income, therefore, is not expected to be material. However, since the majority of BellSouth's operations are regulated, the ultimate effect on the financial statements will depend on the ratemaking treatment authorized.

### Note I - LEASES

BellSouth has entered into operating leases for facilities and equipment used in operations. Rental expenses under operating leases were \$328.9, \$288.8 and \$282.0 for 1992, 1991 and 1990, respectively. Capital leases currently in effect are not significant.

The following table summarizes the approximate future minimum rentals under non-cancelable operating leases in effect at December 31, 1992:
